

Resumo dos eventos solares 08 - 22 de novembro de 2021

EMC:

- Foram observadas três ejeções de massa coronal de halo tipo II (2021/11/09 17:00UT, 2021/11/10 15:16UT, 2021/11/11 09:24UT) nas imagens do coronógrafo do LASCO.

WSA-ENLIL (Ejeções de Massa Coronal (EMC) 2021-11-09T16:48:00)

- A simulação indica que terá pouco ou nenhum impacto na Terra.

WSA-ENLIL (EMC 2021-11-10T15:16)

- A simulação indica que terá pouco ou nenhum impacto na Terra.

WSA-ENLIL (EMC 2021-11-11T09:23)

- A simulação indica que terá pouco ou nenhum impacto na Terra.

Buracos coronais (SPOCA):

- O buraco coronal 34651 foi observado entre os dias 08 e 09 de novembro.
- O buraco coronal 34660 foi observado entre os dias 10 e 12 de novembro.

Summary of Solar Events 08 - 22 November 2021

CME:

- Three coronal mass ejections type II halo (2021-11-09T17:00 UT, 2021-11-10T15:16 UT, 2021-11-11T09:24 UT) were observed on the LASCO coronal images.

WSA-ENLIL (CME 2021-11-09T17:00 UT)

- According to the simulation no or little impact on Earth.

WSA-ENLIL (Prediction for CME 2021-11-10T15:16 UT)

- According to the simulation no or little impact on Earth.

WSA-ENLIL (Prediction for CME 2021-11-11T09:24 UT)

- According to the simulation no or little impact on Earth.

Coronal holes (SPOCA):

- Coronal hole 34651 was identified by SPOCA between the 8th and 9th of November.
- Coronal hole 34660 was identified and observed using the SPOCA between the 10th and 12th of November.
